

Amir Damshekan

Greater Vancouver, BC, Canada , Phone: 778-522-1484 , Email: h.damshekan@gmail.com

Professional Summary

Civil Engineer and Structural Designer with over 15 years of experience in civil infrastructure, steel and reinforced concrete structures, and marine construction projects. Experienced in managing civil engineering and construction activities and preparing detailed engineering drawings, 3D models, and construction documentation using AutoCAD, Civil3D, Tekla Structures, and other civil engineering software.

Proficient in developing civil layouts, site plans, grading plans, and surface models in Civil 3D to support infrastructure and land development projects. Skilled in quantity take-offs, cost estimation, and coordination with engineers, contractors, and construction teams throughout project execution.

Additional experience includes surveying, site layout, and monitoring operations using Total Station equipment, including topographic surveys, UTM mapping, and site control.

Core Skills

- Preparation of civil drawings using AutoCAD and Civil3D
- Development of civil layouts, site plans, grading plans, and construction drawings
- Surface modeling and terrain analysis using Civil3D
- 3D modeling and preparation of detailed drawings using AutoCAD, Civil3D, and Tekla Structures
- Quantity take-offs and cost estimation for civil, structural, and marine construction projects
- Structural analysis and design of steel and reinforced concrete structures using ETABS, SAFE, and SAP2000
- Preparation and review of shop drawings, construction documentation, and technical submittals
- Support for tender documentation, construction packages, and project revisions
- Project scheduling and progress tracking using Microsoft Project and Excel
- Coordination with engineers, architects, contractors, and fabrication teams
- Surveying, site layout, and monitoring using Total Station equipment
- Topographic surveys, site measurements, and preparation of UTM-based drawings and site plans
- Strong communication skills with clients and ability to manage project issues and resolve technical challenges

Professional Experience

Structural Designer / Project Manager – Blue Water Systems Ltd., Vancouver, BC (2024–Present)

- Prepare structural and civil drawings for marine infrastructure and construction projects using AutoCAD and Civil3D
- Develop detailed drawings, site layouts, and 3D models to support fabrication and installation activities
- Assist in preparation of grading layouts, project documentation, and drawing revisions during project execution
- Coordinate with engineers, contractors, and project teams to resolve technical issues and construction challenges
- Assist with quantity take-offs, cost estimation, and preparation of project documentation and construction packages

Project Manager / Structural Designer – Artiman Consulting Engineers, Tehran, Iran (2012–2024)

Licensed member of Tehran Engineering Organization (Grade 1 Certification) in structural design, supervision, and execution of construction projects.

- Designed structural systems for residential, commercial, and industrial buildings
- Prepared construction drawings including plans, sections, structural details, and civil layouts using AutoCAD and Civil3D
- Coordinated with architects, engineers, and contractors during design development and construction phases
- Participated in quantity take-offs, cost estimation, and preparation of tender documentation
- Supervised construction activities to ensure compliance with engineering drawings and technical specifications

Software Skills

Design & Drafting: AutoCAD, Civil3D, Tekla Structures

Structural Analysis: ETABS, SAFE, SAP2000

Project Tools: Microsoft Project, Primavera P6

Office Applications: Microsoft Office (Excel, Word, PowerPoint)

Education

Bachelor of Civil Engineering

Additional Skills

- Experience in marine structure projects and steel fabrication drawings
- Familiar with construction documentation and tender documents
- Strong ability to coordinate with multidisciplinary engineering teams
- Ability to manage and track drawing revisions and project documentation
- Fast learner with strong teamwork, organization, and time management skills
- Reliable, responsible, and capable of handling project challenges and resolving technical issues
